

## New Release

Royal Leerdam's Experts' Collection Carafes are designed to optimally develop the notes and tastes of different types of wines.

**CARAFE FEMME**

<b>Item Code</b>	<b>LB995039</b>
<b>Max Dia.</b>	148mm
<b>Height</b>	289mm
<b>Capacity</b>	1500ml

*Carafe Femme's particular shape means the wine will interact with oxygen in a controlled manner. The tapered design keeps the wine's aromas compact, and the acidity fresh and non-alcoholic. Perfect for complex, young, fruity, and full-bodied wines.*

**CARAFE HOMME**

<b>Item Code</b>	<b>LB995022</b>
<b>Max Dia.</b>	140mm
<b>Height</b>	284mm
<b>Capacity</b>	1500ml

*Carafe Homme with its bold shapes and strong high shoulders, is designed to allow powerful, spicy and complex wines to interact with oxygen. The shape allows a great deal of room for the oxygen, and is suitable for both red and white grape varieties.*

*Use the Roc element to keep wine in the carafes at the right temperature. Reversible to fit both the Femme and Homme carafes, Roc can be used as a cooling as well as a warming element. The element is crafted from a unique type of Finnish soapstone which is over two billion years old. By cooling the stone in the freezer, wines can be kept cool. The element can also be heated in the oven to gently raise the temperature of the wine.*

**ROC BASE ELEMENT**

<b>Item Code</b>	<b>LB997002</b>
<b>Max Dia.</b>	146mm
<b>Height</b>	56mm

**LIBBEY®**
