### “A range developed with Wine Tasting Professionals”

The D.O.C range represents the International Standards Organisations (ISO) profile for wine tasting. The glasses have a distinctive shape that enables the wine to be swirled easily without any spillage. The rim helps contain all the delightful aromas and enhances the appreciation.

These glasses have been scientifically designed to be used across a broad range of wine varietals, all from a single glass – making them the ideal selection for venues seeking an all-purpose stemware option.

#### SPARKX

Sparkx is a new material with an extremely low iron content, providing premium transparency of the glass. These glasses are measured to withstand 2,000 industrial dishwasher cycles with no alteration in transparency. Sparkx is lead and other heavy metal free.
