Easy Heaters is a range of single-use chafing fuel cans built for steady, clean-burning heat beneath buffet service. Manufactured in Australia, the range delivers a consistent flame without odour, keeping buffets optimally heated throughout service.

Three burn times are available across the Easy Heaters range. The two-hour can suits shorter functions, breakfast buffets, and event turnover windows. The four-hour option carries a full lunch or dinner service without interruption. The six-hour can is built for extended functions, all-day conferences, and large-scale catering where a single light needs to last the entire service period. Across all three, heat output stays stable from ignition through to burnout, holding food at safe serving temperatures without scorching pans or drying dishes. Easy Heaters are made to support hotel buffets, banquets, and commercial catering.

Directions for Use

- Remove the lid
- Ensure the can remains in an upright position
- Ignite the wick
- Not to be refilled

Key Features

- Australian made
- Three burn time options: 2-hour, 4-hour, and 6-hour
- Clean-burning and odourless, suited to guest-facing buffet service
- Consistent heat output across the full burn cycle
- Single-use design eliminates spill risk and simplifies service turnover
- Compatible with standard chafing dish frames
