CaterChef

Aluminium body with PPG Eclipse coating.

- Excellent wear, scratch, and abrasion resistance
- Dishwasher and metal utensil safe
- Oven safe up to 260°C
- Easy-clean, premium non-stick performance

- Use low to medium heat to protect the non-stick surface and ensure long-lasting performance
- Always have oil, water, or food in the pan before heating avoid heating cookware while empty
- Allow cookware to cool before immersing in water to prevent thermal shock or warping
- If non-stick performance declines, it may be due to residue build-up — soak overnight in hot, soapy water and wash thoroughly to restore performance
